

## CIRCUS TENT FOR RENT TECH SHEET & RIDER

This document describes in detail what we need in order to set up our tent at your site for your specific event. If you have any questions about the information found here please call the office at (905) 304-7504 for more information.

### HOW IT WORKS

When you rent our circus tent we deliver the tent to your site and help facilitate setup and strike. The tent arrives in a custom 35' long fifth wheel trailer. Our Tent Master and Tent Master's Assistant will lead a local crew for the tent build and tear down. We can rent you just the tent on its own or provide you with various technical (lighting, audio etc.), scenic (circus decorations) and entertainment (circus acts) packages as required.

### TENT DETAILS

#### Manufacturer

- This tent is made by the famous French tent manufacturer Voilerie du Sud Ouest (VSO). [www.vso.fr](http://www.vso.fr).
- This tent is made out of PVC Treated Tent Canvas - Precontraint 702 Ferrari Textile used for sidewalls, rain cap and main element. This is a registered flame resistant product certified by the California State Fire Marshall. Meets NFPA 701 fire tests. Manufacturer: FERRARI TEXTILES CORP = 1510 SW 5<sup>th</sup> Court - POMPANO BEACH, FL 33069. The fire certificates will be provided.

#### Tent Capacity

Tent capacities listed below are for the following standard seating arrangements. Please note that all seating must be supplied locally by the purchaser unless agreed on in advance and listed in the contract.

- Up to 300 seated comfortably on folding chairs or benches with 24' X 24' stage space.
- Up to 450 if bleachers are installed with 24' X 24' stage space.
- Elegantly seats 170 for gala sit down dinners with 24' X 24' stage space.
- Custom seating arrangements are possible. Call to discuss.

#### Dimensions

- Footprint of tent inside guy lines (interior dimensions): 55 X 65 feet
- Exterior guy line perimeter dimensions (total space required): 85 X 88.5 feet
- Height of tent to peak of the masts: 36 feet
- Lowest point of tent ceiling inside the tent between the masts: 28.5 feet
- Sidewall height: 11 feet
- 8 meters span between the two main masts, or 26.2 feet
- There are four exits and each exit opening is 9.8 feet
- Recommended stage size (between the masts) is 24 X 24 feet.

### Additional Items & Features

These additional items come with the basic tent rental package.

- 4 illuminated exit signs.
- 10 no smoking signs.
- Unique double sidewall.
- Overheat truss between the two masts suitable for live load rigging.
- 35' long trailer that can be used as storage or backstage area as required.

### TENT SITE REQUIREMENTS

- Written permission from the property owner for the tent setup listing the dates of the event including setup and strike dates.
- Flat grassy ground not less than 85 X 88.5 feet. Set up on an asphalt surface is possible with the understanding that seventy 1.5" diameter tent poles will need to be driven into the ground. The asphalt can be repaired after we remove the tent.
- Written sign off from the local utilities that either a *locate* has been performed on the site OR it is not necessary. A *locate* is where the utility company comes and scans for any and all underground pipes, wires and vulnerable features. This is not always necessary in a rural setting but almost always required in the city. The fee for the *locate* is the responsibility of the purchaser.
- A temporary building permit from the local authorities. This is easy to get and we will provide the tent drawings and details required.
- An event permit if required.
- Ample parking nearby to accommodate the expected number of guests.
- Parking for our truck and 35' trailer.
- Space for tent/prop trailer & tent master trailer behind the tent.
- Water hook ups as required.
- Electrical hooks up (or powerful quiet generator) – 30AMP 120/208V minimum.
- Nearby restroom facility or port-o-lets.
- Dumpsters/Trash removal systems.

### OTHER REQUIREMENTS FOR OUR TENT

- We work with local labor to save on costs. A crew of 4 able bodied adults capable of hard labor for the set up and strike dates. Crew should come with proper work clothes and boots and everything they need for a full day. Setup and strike will take place rain or shine.
- The tent requires 24-hour security for the duration of time the tent is on site. The degree of security will vary from site to site but it is absolutely necessary to keep the tent safe and secure at all times. This tent tends to attract a lot of attention.
- One Bobcat Skidsteer loader with the "Breaker Attachment 880" (jackhammer). This will be used for driving the 70 X 4' long tent stakes. We travel with the tent post attachment for this jackhammer unit. If the site is sensitive the tracked model causes much less impact than the wheeled ones. This Bobcat is required for set up and strike day only. The "Breaker Attachment 880" is only required for the setup day. The Bobcat by itself is all that is required for pulling the tent stakes out on strike day.

- Insurance as required for the planned event with certificate naming CircusTentForRent and Circus Orange Inc. as additionally insured.

### **ADDITIONAL ITEMS**

We will provide an empty shell tent structure unless it is agreed upon otherwise and it is listed in the contract. The tent purchaser will be responsible for the following items. It is important to note that these items are required for a successful event. We can supply these items at an additional cost if required or offer suggestions if you wish to source locally.

- Lighting equipment package with technicians to operate as required.
- Sound equipment package with technicians to operate as required.
- Tables and chairs as required.
- Staging as required.
- Power as required.
